

Asst Prof Alkema, Leontine

Department of Statistics & Applied Probability

Ph.D. (2008) : University of Washington, Seattle, USA

Postdoctoral Experience:

2008-2009: Earth Institute and Statistics Department,
Columbia University, New York, USA

Research Areas:

- Bayesian statistics for probabilistic population projections, HIV prevalence estimates/projections and poverty measurements.

Achievements:

- Three publications, including a three authored publication in the Annals of Applied Statistics.
- Methodology for HIV prevalence estimation used by UNAIDS for global estimates, fertility projection model to be used by the United Nations for world population projections

Join Date: 23 July 2009
