

Ph.D. (2000) : Uppsala University, Sweden

Postdoctoral Experience:

2006-2009: University Assistant, TU-Vienna, Austria

2005-2006: Research Fellow, University of Heidelberg, Germany

2001-2005: Asst. Prof, Royal Institute of Technology, Sweden

Research Areas:

- Experimental quantum optics and atomic physics.
- Miniaturization of quantum optical experiments.

Achievements:

- Pioneering work on chip based atom traps.
- Realization of efficient single atom detectors
- Experimental demonstration of single particle quantum non-locality.
